The Reichsbahn has received an order to build a switch installation and rail spur on the grounds of the Daimler-Benz motors plant in Ludwigsfelde. The plant had been totally dismantled. The section of the rail spur solution is already completed. Materials used for it came from Maxhuette; the rails were marked "MAX 5. Altogether 57 kilometers of track are to be laid, which means that the plant is intended to be extraordinarily large and efficient. A former workshop 20 x 100 meters in size, which had been blown up, is now being cleared. Electric wiring is also being laid in the plant area. Altogether 1,000 men are employed in the clean-up groups and other groups. The former plant office building has already been cleared and is surrounded by a fence. It is under guard by the People's Police.	Germ	an Democrat	ic Republic
